About This Game

From the makers of Star Wars®: Knights of the Old Republic™, Dragon Age: Origins™, and Mass Effect™ comes the dark second installment in the thrilling Mass Effect Trilogy!

Two years after Commander Shepard repelled invading Reapers bent on the destruction of organic life, a mysterious new enemy has emerged. On the fringes of known space, something is silently abducting entire human colonies. Now Shepard must work with Cerberus, a ruthless organization devoted to human survival at any cost, to stop the most terrifying threat mankind has ever faced.

To even attempt this perilous mission, Shepard must assemble the galaxy's most elite team and command the most powerful ship ever built. Even then, they say it would be suicide. Commander Shepard intends to prove them wrong.

Mankind's Future is At Stake

- Command a unique team of amazing characters on a perilous mission in the most dangerous regions of space.
- Players of the first Mass Effect can import save games to continue the story of their own Commander Shepard. New players will find a thrilling stand-alone adventure awaits them, a polished and action packed journey that surpasses the first game in nearly every possible way.

Intense Third Person Combat

-
- Take cover, command an elite squad with ease, utilize 19 weapon classes including heavy weapons, and unleash deadly powers against your foes with an all new and improved combat system.

An Entire Galaxy to Explore

- Travel the distant and deadly reaches of space to assemble your team for the mission at hand. A cast of amazing characters await discovery on a variety of dangerous and visually stunning worlds

Robust Character Customization

- Choose between 6 player classes, customize your appearance, and tailor your own abilities and strengths. As you progress, so do Shepard's abilities.
- Control the conversation. Improved conversation system where you can take matters into your own hands – often with the liberal application of force.

Cerberus Network

- Includes a code granting access to additional bonus content via the in-game Cerberus Network.

what used to be a decent game is now COMPLETE GARBAGE since EA refuses to fix their games or include years old DLC in the deluxe edition-forget mass effect and EA they have been and always will be UTTER TRASH!. Ignore my hours played, I previously had the game from a "2nd source" many years ago.

Dead DLC = incomplete story progression. With a game series which is harmoniously tied together this is a travesty. Thanks EA!. best mass effect. So this is what its like to have friends.. One of the greatest RPGs ever made.

+Story

++Characters\Companions

++Choice&Consequence

+Decent gameplay with different playstyles

+++L o r e. I think this is the best ME game!. best game 2. If you're reading this and have never played the franchise, don't be ashamed by staring with ME2. ME1 was amazing in its own right and Mako missions aside, they perfected what they were going for with the first game. ME2 is the best game of the franchise for its ability to let you explore the ME universe and really build relations with your crew and learn about them before you have to go off and fight the Reapers\Collectors.

The character development and writing, the lore, and dialogues you have make this game so got dang immersive. Nearly ten years on and the graphics don't even feel dated. The aesthetics are beautiful, the characters are all very well done and the conversations can flow like water. Every couple years I replay the franchise and enjoy it like I did the very first time. 10/10. Buy it from Origin. And yes, it shouldnt be accepted that they are not fixing the DLC for Steam.. Very good game! I definitely recommend it.

I simply do not understand the hype around the Mass Effect games. This one in particular is like KOTOR meets Gears of War, minus the fun parts of both.. game is\u2665\u2665\u2665\u2665\u2665 the dlcs also does not work.

dont waste your money on this. if you really want to play it, i suggest buying it on a discount.. how many years later and this games is still a master piece. Ended up being shorter than I thought, but definitely enough playtime for the price. Was kinda easy, story was okay.. Even after all these years, the game is still amazing.

Reinstalled this game to try ALOT textures mode and did not regret my decision for a second.

Pros:

- +Great story with high stakes
- +Great voice acting
- +Best Mass Effect game and one of the finest Bioware games without a doubt
- +A fun band of misfits to play with, including protagonist Shepherd
- +Combat mechanics still feel nice and are not a drag despite all these years
- +Great music
- +Great atmosphere

Cons:

- Game randomly freezes sometimes
- No sensitivity settings
- FPS limit at 60 FPS and no FPS settings (even changing it from .ini file prevents game from opening at all).
